

Specialists in water treatment

Cooling circuits

The management of your cooling circuits by **Water Team** guarantees **optimal heat exchange** improving both **water** and **energy consumption**, whilst maintaining the integrity of your plants. Specifically, **Water Team** is able to offer:

- Chemical scale inhibitors, corrosion inhibitors, dispersants.
Oxidising and non-oxidising biocides;
- Pre-treatment plants to condition the feedwater of exchangers;
- Automatic purging systems;
- Chemical washing to remove scale from exchangers;
- Regular assistance visits to verify conformity of the plant to specifications;
